DETAILED ACTION

1. The response filed September 29, 2003 and the amendment filed June 26, 2003 have been entered. Upon consideration of applicant's remarks, particularly regarding the position implied by applicant that the dependent claims may be patentable over their respective independent claims, and considering that, at this point, the Examiner's position is that the independent claims are not allowable over the prior art, a restriction requirement is necessary. It is respectfully submitted that there is a very serious burden to examine all of the claims together. However, in an effort to reduce applicant's burden, the number of groups as compared to the previous restriction requirement has been significantly reduced to two groups as described below.

Election/Restriction

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2, 9, 15, 16, 25, 26, 32, 34-38, 40, 45, 47, 48, 55, 56, 58 and 60, drawn toa food press with a specific press structure, classified in class 100.
 - II. Claims 7, 8, 10-13, 23, 24 and 27-30, drawn to a food press with a knife assembly, classified in class 83, subclass 618.
- 3. Independent claims 1, 18, 39, 50, 61 and 62 along with dependent claims 3-6, 14, 17, 19-22, 31, 33, 41-44, 46, 49, 51-54, 57 and 59 are linking claims and are not considered to be part of either of the groups. Thus, these claims will be examined with the elected group. Further, if any

of these claims are determined to be allowable, rejoinder of the claims dependent therefrom will

be considered.

4. The inventions are distinct, each from the other because of the following reasons:

Subcombinations Useable Together

5. Inventions I and II are related as subcombinations disclosed as usable together in a single

combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention of Group I has separate utility such as without

the knife assembly of Group II. Conversely, the invention of Group II has separate utility such as

without the specific details of the press structure of Group I; for example, without the delay

device, the specific lid configuration and the specific interrelationships between the press

components. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, and have acquired a separate

status in the art because of their recognized divergent subject matter, restriction for examination

purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).
